

Rinsing Instructions by Hair Type

- ❖ **WATER PRESSURE:** Medium pressure, not too much or too little.
- ❖ **WATER TEMPERATURE:** Any temperature is okay to use when rinsing.
- ❖ **Concentrate rinsing on roots/hairline and damaged areas. Start at the hairline and finish in lower areas.**
- ❖ **If hair is very damaged or porous, *be sure you have rinsed enough in those areas***
- ❖ **If you are NOT rinsing the product but want to avoid smoke during the ironing process, dilute the product. A light misting with a sprayer or a 2-second rinse at the sink will be enough**
- ❖ **If you want to ensure you have rinsed enough product and the color will not change, take a small section of hair and dry it completely. Pass the flat iron over this section. If you do not see a drastic color change after a few passes, proceed to dry the remainder of the hair and move on to the flat ironing. If you see a drastic color change, bring your client back to the sink and pass over the areas you focused rinsing on again.**

The final results of the Magic Sleek treatment depend heavily on the rinsing process.

Rinse the hair as follows:

- For hair that is **NOT virgin** and is **level 1,2,3, or 4: *rinse approximately 5 seconds***
- For hair that is **NOT virgin** and is **level 5: *rinse approximately 6 seconds***
- For hair that is **NOT virgin** and is **level 6: *rinse approximately 7 seconds***
- For hair that is **NOT virgin** and is **level 7 or 8: *rinse approximately 10 seconds***
- For hair that is **NOT virgin** and is **level 9: *rinse approximately 12 second***
- For hair that is **NOT virgin** and is **level 10: *rinse approximately 15 seconds***

- For hair that is **naturally gray from roots to ends**: we do NOT recommend the use of this product. **Rinse 100%**
- For **virgin hair level 1-8**, do not rinse. **IF HAIR IS DAMAGED or FRAGILE**, *rinse 5 seconds*
- For **virgin hair level 9 or 10**, *rinse approximately 15 seconds*
- For **natural reds**: *do not rinse*
